HERMES
GLOBAL
INTELLIGENT SIMPLICITY IN COMPLEXITY™

COMPANY INTRODUCTION

Hermes SNAPP™ – AI Operational Governance Platform

Hermes Global has evolved in response to a fundamental shift in executive leadership. As artificial intelligence, accelerating regulation, and increasing operational complexity have transformed organizations, traditional governance approaches have struggled to keep pace. The result is a new generation of executive challenges that require more than periodic reviews or compliance checklists. They require operational governance supported by executive intelligence.

The **Hermes SNAPP™ AI Operational Governance Platform** is the culmination of decades of advisory, governance, and strategic experience. This evolution reflects a simple reality: organizations no longer need more information—they need better governance supported by better intelligence. This philosophy is embodied in our **Dynamic Governance™** model, which helps organizations transform governance principles into confident executive decisions.

Powered by the proprietary **NEWDAWN CORE™** Executive Intelligence Engine, the **Hermes SNAPP™** platform helps organizations transform governance principles into confident executed decisions through the **Dynamic Governance™** model.

THE EXECUTIVE INTELLIGENCE SUITE

The **Hermes SNAPP™** platform delivers this capability through an integrated Executive Intelligence Suite:

NEWDAWN SENTINEL™	Executive Governance Intelligence, governance examinations, and executive recommendations.
NEWDAWN WATCHER™	Continuous operational monitoring, governance pattern intelligence, and emerging risk detection.
NEWDAWN NAVIGATOR™	Governance strategy, implementation guidance, and executive roadmaps.
NEWDAWN HORIZON™	Future governance intelligence, strategic foresight, and long-term organizational resilience.

Together, these solutions help organizations move beyond traditional point-in-time assessments toward continuous operational governance that supports executive accountability, organizational resilience, and informed decision-making.

We believe intelligence should simplify complexity—not add to it. Our mission is to help organizations establish the governance capabilities increasingly expected by executive leadership, regulators, industry standards, and stakeholders while preserving the flexibility to innovate responsibly.

Hermes Global exists to help organizations **transform governance principles into confident executive decisions.**
