HERMES GLOBAL
INTELLIGENT SIMPLICITY IN COMPLEXITY™

THE FOUNDERS

Hermes Global was founded to help organizations navigate the age of artificial intelligence with clarity, independence, and executive accountability.

DOMINIQUE LUCHART, J.D.

FOUNDER & CHIEF EXECUTIVE OFFICER

Dominique Luchart, J.D. is the Founder and Chief Executive Officer of Hermes Global, where she leads the company's long-term vision and the development of Executive Intelligence for the era of Human–AI Partnership.

A strategist whose work spans future systems, artificial intelligence, social evolution, leadership architecture, and organizational transformation, she has spent her career exploring how emerging technologies reshape stewardship, institutions, and society.

Her work has developed an interdisciplinary perspective that bridges executive leadership with long-term societal change. It reflects a continuing exploration of how organizations can navigate complexity while preserving human judgment, responsibility, and purposeful leadership.

Since 2009, her research has focused on the long-term evolution of artificial intelligence and Human–AI Partnership, evolving into a broader philosophy of responsible innovation and Dynamic Governance™.

That work forms the intellectual foundation of Hermes Global and the Hermes SNAPP™ AI Operational Governance Platform, powered by the proprietary NEWDAWN CORE™ Executive Intelligence Engine.

Today, it continues to guide the development of executive intelligence designed to help organizations strengthen governance, transform governance principles into confident executive decisions, and prepare leadership for the future of AI.

SPENCER BECK

FOUNDER & CHIEF OPERATING OFFICER

Spencer Beck is the Founder and Chief Operating Officer of Hermes Global, where he leads the company's operational strategy, enterprise leadership, and the practical implementation of executive intelligence through the Hermes SNAPP™ AI Operational Governance Platform.

An executive whose work has centered on corporate development, strategic growth, and enterprise leadership, he has spent his career helping founders, executives, and organizations transform opportunity into enduring enterprise value. With more than $700 million in completed business transaction value, his experience has expanded beyond corporate development into governance and executive oversight.

Over the course of his career, he has developed a practical executive perspective rooted in transparency, disciplined execution, and responsible leadership. His long-term thinking reflects the belief that sound strategy depends upon clarity. As the volume of information, regulation, and artificial intelligence continues to accelerate, executive leadership increasingly depends on disciplined processes that separate meaningful intelligence from noise, enabling confident decisions grounded in sound judgment.

At Hermes Global, he helps transform long-term vision into disciplined execution through Hermes SNAPP™, the company's AI Operational Governance Platform. Working alongside the development of Dynamic Governance™ and the proprietary NEWDAWN CORE™ Executive Intelligence Engine, he continues to help organizations strengthen executive oversight, improve decision-making, and prepare leadership for the future of artificial intelligence.

TWO FOUNDERS. ONE MISSION.

Together, the founders combine executive governance, intelligence, and transaction expertise to help organizations make better decisions in an increasingly complex AI-driven world.
